A modern adaptation of Colonial style in which all rooms are of good size. The living room presents an interesting plan with the fireplace in the center of the house and the picture window overlooking the street.

For purposes of economy, the kitchen and bath are placed back-to-back. The kitchen is designed to allow for the maximum of cases and counters.

Basement has a recreation room the same size as the living room. If the site permits, it is a simple matter to put a garage in the basement under the bedrooms. The stairs are well located for this addition.
